INFORMATION FOR AUTHORS

The journal *Organizational Behavior and Human Decision Processes* will publish papers describing original empirical research and theoretical developments in all areas of human performance theory and organizational psychology. Preference will be given to those articles which contribute to the development of principles or theories relevant to human performance or organizational behavior.

Manuscripts should be submitted to the Editor, James C. Naylor, Department of Psychology, 142 Townshend Hall, Ohio State University, 1885 Neil Avenue Mall, Columbus, Ohio 43210. Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and other material published in *Organizational Behavior and Human Decision Processes* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be prepared on high quality bond paper with wide margins using double spacing throughout. At least four copies should be submitted, each copy to include all figures and tables. Each page of the manuscript should be numbered. The first page should contain the article title, author's name and affiliation. At the bottom of this page list the name and complete mailing address of the person to whom proofs are to be sent. The second page should contain an abstract.

Authors are requested to follow the instructions given by the *Publication Manual of the American Psychological Association,* 3rd ed., 1983. Certain modifications are listed below.

Equations. Equations should be numbered consecutively with the number placed in parentheses to the right of the equation. Limit numbering only to those equations that are in the main stream of the mathematical development. Refer to equations as Eq. (3) or simply (3), except at the beginning of a sentence when the word Equation should be spelled out. Equations should be punctuated to conform to their place in the syntax of the sentence.

Abbreviations and Symbols. Please do not use the abbreviations *S, E,* and *O* for subject, experimenter, and observer. Also do not underline symbols in text or formula, for they will be routinely set in italics. Unusual symbols should be identified in pencil in the margin the first time they appear.

Figures and Tables. All illustrations are to be considered as figures, and each graph or drawing should be numbered in sequence with Arabic numerals. Each figure should have a descriptive legend and these should be listed on a separate sheet. Figures should be planned to fit the proportion of the printed page (4½ × 6¾ inches), and care should be taken that lettering on the original is large enough to be legible after a reduction of 50 to 60 percent. All figures must be original drawings or glossy prints. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table. Footnotes to tables should be identified by superscript letters and placed at the bottom of the page containing the table. Footnotes in the text should be identified by superscript numbers and listed consecutively on a separate page.

References. Literature reference in the text should be cited by author's surname and the

year of publication, e.g., Roe (1980): Roe *et al.* (1981): Roe and Jones (1983, p. 150) (for references to a specific page). If a reference has more than two authors, the citation includes the surnames of all authors at the first mention, but later citations of the same reference include only the surname of the first author and the abbreviation "*et al.*" Suffixes *a, b,* etc., should be used following the date to distinguish two or more works by the same author(s) in the same year, e.g., (Roe, 1980a, 1980b). Literature citations in the bibliography should be arranged alphabetically according to the surname of the author. Journal titles should be written out in full rather than abbreviated. Please note style of capitalization and punctuation for journal articles, books, and edited books in the following examples:

Miner, F. C., Jr. (1984). Group versus individual decision making: An investigation of performance measures, decision strategies, and process losses/gains. *Organizational Behavior and Human Performance,* 33, 112–124.

Deci, E. L., & Ryan, R. M. (1980). The empirical exploration of intrinsic motivational processes. In L. Berkowitz (Ed.), *Advances in experimental social psychology* (Vol. 13, pp. 39–80). New York: Academic Press.

Mowday, R. T., Porter, L. W., & Steers, R. M. (1981). *Employee-organization linkages: The psychology of commitment, absenteeism, and turnover.* New York: Academic Press.

Proofs and Reprints. Proofs will be sent to the author with reprint order forms. Authors will be charged for alterations in excess of 10% of the cost of composition. Fifty reprints of each article will be provided free of charge.

Personal Computer Disks. Manuscripts may be submitted to *Organizational Behavior and Human Decision Processes* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).

Special subscription rates are available for members of the Society for Judgment and Decision Making and for members of the Society for Organizational Behavior. If you are not a member of the Society for Judgment and Decision Making, application forms may be obtained from Dr. Stephen Edgell, Department of Psychology, University of Louisville, Louisville, Kentucky 40292. Members of either society may obtain information concerning special rates from the Publisher, Academic Press, Inc., Journal Division, 525 B Street, Suite 1900, San Diego, California 92101-4495.

Journal of Research in Personality

Editor
David C. Funder
University of California
Riverside

Emphasizing experimental and descriptive research, the **Journal of Research in Personality** presents articles that examine important issues in the field of personality and in related fields basic to the understanding of personality. The subject matter includes treatments of genetic, physiological, motivational, learning, perceptual, cognitive, and social processes of both normal and abnormal kinds in both human and animal subjects.

Features

- Brief notes and critiques
- Presentations of an integrated series of independent studies concerned with significant theoretical issues relating to personality
- Theoretical papers and critical reviews of current experimental and methodological interest

Volume 28 (1994), 4 issues
ISSN 0092-6566
In the U.S.A. and Canada: $186.00
All other countries: $229.00
